Total	548 <sup>4</sup>	1635	808

- AIDS cases reported for SLVHD from 1983 through May 31, 2004. Actions reported for SLVHD from April 24, 1989 through May 31, 2004. HIV statistics do not include persons tested anonymously.
- <sup>2</sup> Cases with more than one risk factor are tabulated only in the category listed first.
- "Undetermined" refers to patients whose mode of exposure to HIV is unknown. This includes patients under investigation; patients who died, were lost to follow-up, or refused interview; and patients whose mode of exposure to HIV remains undetermined after investigation.
- <sup>4</sup> Total fluctuates as HIV infections become AIDS cases.

Percentages may not equal 100 because of rounding. All data is provisional.
